SUMMARY

Product Designer specializing in e-commerce and healthcare systems. I design conversion-focused storefronts and landing pages and complex multi-role enterprise workflows, and I stay involved from research through developer handoff and Design QA. Results include +116% conversion, 2.3× ROAS, +40% organic traffic, and contributing to +1,125% active user growth.

EXPERIENCE

Product Designer (E-commerce)

May 2024 – Present

BlazeCommerce · Australia · Remote

Conversion-focused WooCommerce and WordPress experiences for international e-commerce brands.

- Increased organic traffic by 40% through improved information architecture, navigation, and SEO-conscious UX.
- Improved conversion by 25% by redesigning customer journeys, product discovery, and purchase flows.
- Designed 19+ e-commerce websites and web applications across Shopify, WooCommerce, WordPress, and Framer for international brands.
- Built reusable component libraries and scalable design systems that improved design consistency across client projects.
- Partnered with developers throughout implementation, providing developer handoff, design documentation, and Design QA.

Product Designer (Growth & Commerce)

Jan 2025 – Jan 2026

DSCommerce · Germany · Remote

High-performing Shopify and WooCommerce experiences for European e-commerce brands in the DACH market.

- Improved conversion by 116% across 29+ conversion-focused landing pages for the DACH market through UX optimization and A/B testing.
- Increased campaign performance to 2.3× ROAS by optimizing product discovery and purchase journeys.
- Used Microsoft Clarity, Google Analytics, heatmaps, and session recordings to identify friction and prioritize improvements.

Senior Product Designer

Jan 2022 – May 2024

NOTES Healthcare ERP · Indonesia

Enterprise healthcare ERP integrating BPJS, SATUSEHAT, and Dukcapil across hospitals and clinics.

- Contributed to +1,125% active user growth.
- Redesigned the doctor salary experience, increasing feature usage by 70% and reducing drop-off in multi-step flows from 47% to 11%.
- Led end-to-end product design across complex multi-role workflows for doctors, nurses, pharmacists, administrators, and patients.
- Built scalable design systems using Figma Variables, Auto Layout, and standardized interaction patterns across multiple ERP modules.
- Partnered with PMs and engineers from discovery through Design QA, providing developer handoff and implementation reviews.
- Integrated Claude, Cursor, and Figma AI to accelerate prototyping, research synthesis, and documentation.

UX Designer

2022

Kampus Indonesia · Indonesia

- Designed responsive web and mobile learning experiences for an online education platform.
- Conducted usability testing and user interviews to improve onboarding and course discovery.

Lead UX Designer

2021

Diceritain · Indonesia

Mental health peer-support mobile application.

- Led end-to-end UX design from research through prototype, building the product's first design system and interaction foundation.
- Supported product growth reaching 27,000+ user session hours through qualitative research with students and young professionals.
